

**SOUTH CAROLINA HAZARDOUS WASTE COMPLIANCE CHECKLIST
TRANSPORTERS, RECYCLERS, AND MISCELLANEOUS**

FACILITY _____

EPA ID # _____

INSPECTOR _____ **DATE** _____

MATERIALS NOT SUBJECT TO REGULATIONS WHEN RECYCLED - DOR or GOR

A) Industrial ethyl alcohol that is reclaimed, except when exported B) Scrap metal C) Used oil that exhibits one or more characteristics except when burn for energy recovery D) Fuels from a petroleum refinery E) Petroleum coke produced from petroleum refinery hazardous waste which contains oil and is generated by the same person - unless coke product exceeds one or more of the characteristics of hazardous waste in Subpart C F) Sludges exhibiting a characteristic of hazardous waste that are reclaimed provided they are not accumulated, stored or treated before recycling G) By products exhibiting a characteristic of hazardous waste provided they are not recycled or accumulated, stored or treated before recycling H) Commercial chemical products listed in Section 261.33 that are reclaimed or speculatively accumulated (meeting requirements and otherwise properly stored) provided they are not recycled or treated before recycling.

MATERIALS REGULATED UNDER 266, 270 AND 124 THAT REQUIRE COMPLETION OF INDICATED CHECKLIST - DOR or GOR

A) Recyclable materials used in a manner constituting disposal B) Hazardous waste burned for energy recovery in boilers and industrial furnaces not regulated under 264 and 265 C) Recyclable materials from precious metals that are reclaimed D) Spent lead acid batteries that are being reclaimed E) Use oil that is recycled and is also a hazardous waste solely because it exhibits a hazardous characteristic.

THE FOLLOWING MATERIALS ARE NOT SOLID WASTES WHEN RECYCLED BUT ARE SUBJECT TO THE REQUIREMENTS FOR GENERATORS, TRANSPORTERS AND STORAGE - DOR or GOR

A) Used or reused as ingredients in an industrial process except for reclaimed or land disposed B) Used or reused as effective substitutes for commercial products C) Returned to the original process from which they are generated without being first reclaimed or land disposed

THE FOLLOWING MATERIALS ARE SOLID WASTES IF RECYCLED OR ACCUMULATED, STORED OR TREATED BEFORE RECYCLING - DOR or GOR

A) Materials that are applied to or placed on the land. Except for commercial chemical products, off-specification species, container residues and spill residues thereof listed in 261.33 and are used in their ordinary manner B) Burned for energy recovery, except for commercial chemical products listed in 261.33 if they are themselves fuels C) Materials that are reclaimed, except for sludges and by products exhibiting a characteristic of hazardous waste and commercial chemical products listed in 261.33 D) Materials that are accumulated speculatively, except for commercial chemical products listed in 261.33 (Need to have proper documentation to show that less than 75% by weight or volume is accumulated during a calendar year) E) Inherently waste-like materials to include F020, F021 (unless used as an ingredient to make a product at the site of a generator), F022, F023, F026 and F028 and secondary materials fed to a halogen furnace as specified in 261.2(d)(2)

MATERIALS CONSTITUTING DISPOSAL, 266 SUBPART C - DOR or GOR		
<p>A)Recyclable materials applied to or placed on land B)Recyclable materials which meet the exemption standards --- Final product's hazardous constituents have become inseparable by physical means (TCLP), Commercial fertilizers for general public use that meets treatment standards and prohibition levels (TCLP), Zinc containing fertilizers using hazardous waste K061 for general public use.</p> <p>NOTE: If recyclable materials are not considered exempt they are subject to applicable requirements in 262, 263, 264 and 265, 266, 124, 270, RCRA Section 3010 and SCHWMA 44-56-120 as outlined in 266.</p>		
PRECIOUS METAL RECOVERY, 266 SUBPART F - DOR or GOR		
<p>A) Notification requirements B)Manifest requirements C)Records showing the volume of those materials stored at the beginning of each calendar year D)The amount of these materials generated or received during each calendar year E)The amount of material reclaimed at the end of each calendar year.</p>		
LEAD-ACID BATTERY RECLAMATION, 266 SUBPART G - DOR or GOR		
<p>A) Spent batteries being reclaimed (including regeneration) B)Storage before reclamation (other than spent batteries that are to be regenerated)</p> <p>NOTE: Persons who generate, transport or collect spent batteries or store spent batteries but do not reclaim them (other than spent batteries that are regenerated) are not subject to 262-266, 270, 124, SCHWMA 44-56-120 or 3010 RCRA.</p> <p>NOTE: If batteries stored before reclamation complete checklist for General Facility Standards (except waste analysis), Preparedness and Prevention, Contingency plan, General Reporting Requirements (except manifests and manifest discrepancies), Ground Water (if applicable), Closure/Postclosure, Containers (if applicable) and Tanks (if applicable).</p>		
"USED OIL FUEL", 266 SUBPART E - GOR or DOR		
<p>A) Meets the definition of "used oil" B)Burned for energy recovery in an industrial furnace or boiler C)Not regulated under Subpart O of 264 or 265 D)Includes any fuel produced from used oil processing, blending or other treatment E)Does not contain more than 1000 ppm of total halogens F)May contain hazardous waste only if generated by a CESQG</p>		
USED OIL CONSTITUENTS - GOR or DOR		
<p>A) Contains less than 5 ppm Arsenic, 2 ppm Cadmium, 10 ppm Chromium, 100 ppm Lead B)Flash point < 100 degrees F C)Total halogens 4000 ppm (provide anything over 100 ppm of total halogens is demonstrated not hazardous to SCDHEC)</p> <p>NOTE: If over any of these limits the oil is considered "off spec used oil".</p>		

USED OIL MARKETING - GOR or DOR		
<p>A) Obtain analysis or documentation verifying constituents B) Notify SCDHEC and obtain a U.S. EPA ID # C) Provide the receiving facility proper invoice when initiating a shipment of "off spec used oil" D) Obtain the required notices from burner or marketer that they have been properly authorized by SCDHEC E) Maintain proper records</p> <p>NOTE: A generator is not a marketer if the used oil fuel is not marketed directly to a burner or the generator burns it for energy recovery.</p>		

OFF SPEC OIL REQUIREMENTS - DOR or GOR		
<p>A) Given to burners or other marketers having notified SCDHEC and obtained a U.S. EPA ID # B) Burned oil in an industrial furnace C) Burned in a boiler 1) located on site of a facility engaged in a manufacturing process where substances are transformed into new products; 2) utility boilers; 3) oil fired space heaters provided used oil is used by the generator or supplied by do-it-yourself oil changers (household waste)</p>		
USED OIL BURNER - DOR or GOR		
<p>A) Notification requirements-location and general description of used oil management activities B) Required notices C) Used oil analysis D) Record keeping</p>		

TRANSPORTER - TRG		
<p>A) Current permit B) Financial responsibility C) Export and import D) Manifest E) Training F) Shipping G) Spill reporting and cleanup H) < 10 days at transfer facility I) Delivered to permitted facility J) Generator standards and SCDHEC's written permission before mixing wastes from different generators</p>		

NA - Not Applicable
D - Deficiency
ND - No Deficiency
C - Concern
